

# 2021 BOND PROJECTS

MARCH 2022 | PROJECT UPDATE

Due to current market inflation and lead time delays the start of construction for these projects has been delayed. School district leadership and the design team have been working closely over the last several months on value engineering efforts and adjusting the construction details in order to meet budget. The updated schedule proposes a mid-2022 ground breaking.

## EARLY CHILDHOOD LEARNING CENTER CLASSROOM ADDITION

The expansion to the existing Early Childhood Learning Center is planned to include not only additional classrooms, but also the ability for the popular program to grow and increase student capacity with more schedule options.

### THE EXPANSION WILL INCLUDE:

- 3 additional classrooms
- Large multi-purpose space
- Full service kitchen
- Renovating of existing building to add another classroom
- New restrooms and storage

## NEW ALTERNATIVE EDUCATION BUILDING

The new facility will allow a stand-alone space for Alternative Education serving students grades K-12. Planned to be located near the Moberly Area Technical Center and high school, but with its own driveway access and parking lot.

### THE NEW FACILITY WILL INCLUDE:

- Updated alternative educational environment
- 12 classrooms
- Cafeteria/Gym
- Full service kitchen
- Counselor support spaces
- Proximity to middle school, MATC and high school buildings

## MOBERLY HIGH SCHOOL MULTI-PURPOSE BUILDING ADDITION

This new enhancement to the high school is still in the planning phase. Members of the school district leadership, athletics, and staff have been working with the design team on options for this expansion and the components to be included.

### POSSIBLE OPTIONS FOR THE NEW SPACE INCLUDE:

- Indoor multi-purpose space for JROTC, sports, and community use
- Sport courts, bleachers, and field markings for athletic competitions and events
- Flexible arrangements for many group uses by school or community
